

Service Information

Oil change kit for automatic transmission

CAUTION

Risk of burns due to contact with hot oil.

Slight to moderate injury possible.

- ⇒ Wear protective goggles.
- ⇒ Wear protective gloves.
- ⇒ Wear protective clothing.

NOTICE

Property damage due to electrostatic discharge (ESD) possible.

- ⇒ Observe ESD protection.
- ⇒ Do not touch the contacts.
- ⇒ Wear conductive workwear.
- ⇒ Use ESD transport.
- ⇒ Use ESD protective packaging.

NOTICE

Observe the following instructions to prevent damage to the transmission:

- Do **not** tow vehicle if transmission is without oil. Observe the vehicle manufacturer specifications.
- For cleaning only use clean, **lint-free** cloths.
- Do **not** start the engine if there is no oil in the transmission.
- Only use the specified oil.
- Do not use any further additives as they alter the chemical composition of the oil!
- Adjust the oil level in the transmission exactly according to filling regulations. If the oil level is too low, the transmission will be damaged. If the oil level is too high, the excess oil will leak from the transmission through the overflow when heated. The escaping oil can ignite on hot parts (e.g. exhaust system).
- Adhere to the bolting sequence.
- Observe tightening torques.
- Observe the vehicle manufacturer specifications.

Automatic transmissions are filled with specially developed oils.

At very high operating temperatures, the oil ages faster than under normal conditions.

Examples:

- Many trips at high speeds
- Many trips while towing a trailer
- Sporty driving

Maintenance interval: observe the vehicle manufacturer specifications.
