

AFTERMARKET

Repair kits for BASICPOWER

Asian Off-Highway Applications

ZF Aftermarket is at the forefront of innovation, offering a wide range of transmission products designed to enhance vehicle performance and efficiency. Our offerings include complete transmission units that ensure smooth and reliable power delivery, alongside high-quality bearings and sealings that guarantee optimal lubrication and protection. With our wider portfolio of gear parts, range selectors, oils and lubricants as well as oil filters, electronics (including control units), torque converters and swing drives – amongst many more – make ZF Aftermarket THE partner when it comes to high-performance transmissions for construction machinery.

ZF BASICPOWER Repair Kits

Taking into consideration the challenges of the modern workshop and in order to minimize the downtime of the vehicle, ZF Aftermarket created a set of repair kits that will make the life of a workshop technician much easier and will reduce the time for spare parts search and ordering, as well minimize the risk of a wrong part ordering. Apart from simplifying the ordering process, stock-holding challenge, the customer will get a price advantage in comparison to single part ordering.

Based on years of technical experience in ZF owned workshops, repair kits have recently been defined for selected product ranges.

Through the launch of these repair kits, complexity is significantly reduced, not only for our customers, but also for ZF since:

- One kit part number being applicable to multiple transmission part numbers.
- Individual component part numbers do not have to be ordered, reducing the risk of ordering the incorrect individual part number.
- Stock-holding is simplified as fewer part numbers have to be kept in stock, simplifying the task of forecasting for our customers.

The repair kits offered in this brochure are applicable to the following BASICPOWER transmission variants:

- 4681.054.015 4 BP 210
- 4681.084.018 4 BP 230
- 4681.084.019 4 BP 230
- 4681.084.020 4 BP 230

In order to verify whether or not the list of kits are applicable to your transmission, please refer to the data-plate on the transmission and ensure that it is one of the above parts list numbers.

		Engineered by ZF Friedrichshafen AG, Germany Manufactured by Liuzhou ZF Machinery Co. Ltd, China	
Type 			
Parts List No. 		Serial No. 	
Customer's Part No. 			TE-ML
Characteristic 			

1. Product designation
2. Optional QR Code
3. Parts list [BoM] number
4. Serial number
5. Customer spec. number, if known to ZF
6. Number of List of Lubricants

The following data should always be quoted when making inquiries or undertaking repairs: 1, 3, 4
