Disclaimer: The lubricants and providers listed herein are presented solely for the purpose of documenting lubricants that were tested for compatibility with our products. This listing does not constitute an endorsement, recommendation, or preference for any of the mentioned lubricants, manufacturers, or providers. The inclusion of any lubricant in this list does not imply that it is superior to other available options, nor does it indicate that other lubricants or providers are unsuitable for use with our products. There may be additional lubricants, manufacturers, or providers — whether known or unknown to us — that are fully compatible or otherwise appropriate. It remains the sole responsibility of each customer to verify and comply with all applicable sanction laws and regulations prior to purchasing any of the mentioned lubricants.

1. Approved lubricant classes

Product groups	Lubricant classes for service fills ^(1, 2)
Gearboxes for industrial and mobile applications of ZF Industriefahrzeuge Witten GmbH GPT, GFC, GPT-W, GFB, GME, GMH, IMK, GPC, GFA, GP	27A, 27B, 27C, 27D, 27E, 27F, 27G, 27H, 27I, 27J

2. Explanation of footnotes and comments

Footnotes

- (1) The required viscosity class is described in the operating instruction or on the rating plate. In addition, the ZFN-W 17-184 in the operating instruction must be considered.
- (2) Refer to the following pages for approved commercial products.
- (3) The pour point helps the user to determine how suitable the gear oil is for use in cold weather. The specified pour point is based on the information supplied by the relevant manufacturer (product data sheet) at the time of creating this Standard. ZF Industriefahrzeuge Witten GmbH does not check or monitor this information. The pour point, as defined in DIN ISO 3016, is not the same as the oil's lowest operating temperature. If you require this information, please contact the lubricant manufacturer or supplier.

Comments

A lithium saponified multipurpose grease of NLGI class 3 which is mixable with mineral oil is to be used at greasing points (grease code KP3K-30 in acc. with DIN 51825 or ISO-L-XCCHB3 in accordance with ISO 6743-9).

Additives of any kind added **later** to the oil change the oil in a manner that is unpredictable, and they are therefore not permitted. No liability of any kind will be accepted by ZF for any damage resulting from the use of such additives.

3. Lubricant classes and approved trade products

Lubricant class 27A
Lubricant CLP mineral oil
Viscosity class: ISO VG 100

Manufacturer (27A)	Trade name (27A)	Pour point [°C] (3)
EXXONMOBIL	MOBILGEAR 600 XP 100	-24
OLMA d.o.o.	OLMAREDOL FL 100	-18
SHELL	OMALA S2 GX 100	-24

Lubricant class 27B

Lubricant CLP poly-alpha-olefin oils or partially synthetic
Viscosity class: ISO VG 100

Manufacturer (27B)	Trade name (27B)	Pour point [°C] (3)
KLÜBER LUBRICATION	KLÜBERSYNTH GEM 4-100 N	-40

Lubricant class 27C

Lubricant CLP mineral oil

Viscosity class: ISO VG 150

Manufacturer (27C)

EXXONMOBIL
