ALLGEMEINE BETRIEBSERLAUBNIS (ABE)

nach § 22 in Verbindung mit § 20 Straßenverkehrs-Zulassungs-Ordnung (StVZO) in der Fassung der Bekanntmachung vom 26.04.2012 (BGBl I S.679)

Nummer der ABE: 61259*03

Gerät: Austauschbremserschlauchleitungen

Typ: TRW-Flex

Inhaber der ABE
und Hersteller: TRW KFZ Ausrüstung GmbH
DE-56566 Neuwied

Für die oben bezeichneten reihenweise zu fertigenden oder gefertigten Geräte wird dieser Nachtrag mit folgender Maßgabe erteilt:

Die sich aus der Allgemeinen Betriebserlaubnis ergebenden Pflichten gelten sinngemäß auch für den Nachtrag.

In den bisherigen Genehmigungsunterlagen treten die aus diesem Nachtrag ersichtlichen Änderungen bzw. Ergänzungen ein.

Kraftfahrt-Bundesamt

DE-24932 Flensburg

2

Nummer der ABE: 61259*03

Die Austauschbremserschlauchleitungen, Typ TRW-Flex, dürfen auch zur Verwendung an den in den beiliegenden Prüfunterlagen genannten Achsen der aufgeführten Kraffräder unter den dort genannten Bedingungen feilgeboten werden.

Im Übrigen gelten die im beiliegenden Nachtragsgutachten der Typprüfstelle Fahrzeuge/Fahrzeugteile der TÜV Rheinland Kraftfahrt GmbH, Köln, vom 02.03.2016 festgehaltenen Angaben.

Flensburg, 01.08.2016
Im Auftrag

Jan Hendrik Schneider

- Anlage -

Nebenbestimmungen und Rechtsbehelfsbelehrung

Nebenbestimmungen

Die in der bisherigen Genehmigung enthaltenen Auflagen gelten auch für diesen Nachtrag.

Rechtsbehelfsbelehrung

Gegen diese Genehmigung kann innerhalb eines Monats nach Bekanntgabe Widerspruch erhoben werden. Der Widerspruch ist beim **Kraftfahrt-Bundesamt, Fördestraße 16, 24944 Flensburg**, schriftlich oder zur Niederschrift einzulegen.

Fahrzeugteil : Austausch- Bremsschlauchleitungen
Typ : TRW- Flex
Hersteller : TRW KFZ Ausrüstung GmbH

- 1.0 Antragsteller/ Hersteller:** TRW KFZ Ausrüstung GmbH
Rudolf- Diesel Str. 7
D- 56566 Neuwied
- 1.1 Typ:** **TRW-Flex**
- 1.2 Art des Teiles:** Bremsleitungen aus flexiblen, stahlummantelten Teflonschläuchen mit verpressten Anschlüssen zum Anbau an Krafträdern
- 1.3 Kennzeichnung:** 
- 1.4 Art / Ort der Kennzeichnung:** Herstellerlogo auf dem Knickschutz, Typ und Typzeichen auf Überzug
- 1.5 Befestigung:** An den vom Fahrzeughersteller vorgegebenen Befestigungspunkten der Originalleitungen
- 1.6 Durchmesser,**
innen: 3.2 mm
außen: 6.4 mm ohne Ummantelung
8.0 mm mit PVC- Ummantelung
- 1.7 Werkstoffe,**
Innerer Schlauch: Teflon PTFE
Gewebe: Edelstahldraht
Ummantelung, wahlweise: PVC- Schlauch
Anschlüsse: Aluminium / Edelstahl
mit Edelstahl – Presshülsen
- 1.8 Systembeschreibung:**
Flexible Hydraulikbremsleitungen mit fest verpressten Anschlüssen zum Austausch für die Originalleitungen.

Fahrzeugteil : Austausch- Bremserschlauchleitungen
Typ : TRW- Flex
Hersteller : TRW KFZ Ausrüstung GmbH

2.0 Durchgeführte Prüfungen

Die Prüfungen fanden in der 09. Woche 2016 in Sulzbach und Saarbrücken statt.

Hinsichtlich Dauerhaltbarkeit genügen die Leitungen den Anforderungen der FMVSS 106, die Anbauprüfungen sowie das Bremsverhalten nach 93/14/EG bzw. ECE R78 bleiben unverändert wie bisher.

3.0 Verwendungsbereich

Die beschriebenen Bremsleitungen dürfen nur an den in der Anlage 1/03 genannten Kraft rädern verwendet werden.

Wahlweise sind auch an den im Verwendungsbereich genannten Krafträdern vom Serienzu- stand abweichende Leitungslängen, Anschluss- und Verlegungsarten zulässig.

3 Arten der Verlegung werden unterschieden:

- OEM (serienmäßige Verlegung)
- RACE (direkt vom Bremszylinder zu den Bremszangen)
- MAIN & BRIDGE (vom Bremszylinder zur Bremszange u. Verbindung zur anderen Seite)

Dabei sind fahrzeugbezogene Montageanleitungen erforderlich, welche den abweichenden Sachverhalt näher beschreiben.

4.0 Auflagen und Hinweise

4.1 Der Anbau hat nach der Montageanleitung des Antragstellers zu erfolgen.

4.2 Die erforderlichen Umrüstungen sollten in einer Fachwerkstatt erfolgen.

4.3 Eine Prüfung des Anbaus (Änderungsabnahme) ist lediglich erforderlich:

- wenn die Krafträder im Einzelverfahren nach § 21 StVZO in den Verkehr gekommen sind, gekennzeichnet durch "EBE" in der Spalte ABE/ EG-BE oder
- wenn entsprechende Hinweise im Verwendungsbereich darauf hinweisen sollten, dass eine Anbauabnahme erforderlich wird.

5.0. Prüfergebnis

Bremsleistung, Dosierbarkeit der Bremse sowie Regelverhalten i. V. m.

ABS- Bremsanlagen sind mit den serienmäßig ausgestatteten Fahrzeugen vergleichbar.

Die mit den Austauschbremsleitungen des Herstellers TRW ausgerüsteten Krafträder ent- sprechen den heute gültigen Vorschriften der StVZO sowie den hierzu ergangenen Richtli- nien und Anweisungen.

Fahrzeugteil : Austausch- Bremsschlauchleitungen
Typ : TRW- Flex
Hersteller : TRW KFZ Ausrüstung GmbH

Sie entsprechen darüber hinaus den Vorschriften der Richtlinie 93/14/EG sowie der ECE R78 in den aktuellen Fassungen.

Es ergaben sich bei den Prüfungen keine kritischen Fahrzustände.

Grundsätzlich wird eine Abnahme des Anbaus durch einen amtlich anerkannten Sachverständigen / Prüfer für den Kraftfahrzeugverkehr oder den Prüferingenieur einer anerkannten Überwachungsorganisation nicht für erforderlich gehalten.

Anmerkung zu der Spalte "ABE / EG-BE"

(VO) Diese Fahrzeuge wurden nach der Rechtsvorschrift VO (EG), Nr. 168/2013, Anh. VIII geprüft, alle anderen Fahrzeuge haben entweder eine nationale Genehmigung "ABE" oder eine europäische gemäß 92/61/EG bzw. 2002/24/EG

DE Modellunabhängige Montageanleitung für Stahlflex Bremsleitungen

Diese Anleitung dient nur als Richtlinie und ist nicht spezifisch für einen bestimmten Fahrzeugtyp. Für detaillierte Anweisungen richten Sie sich jeweils nach dem technischen Handbuch des Fahrzeugherstellers.

Aus Sicherheitsgründen dürfen alle Wartungs- und Instandsetzungsarbeiten nur von ausgebildeten Fachkräften nach den Richtlinien und Vorschriften des Fahrzeugherstellers durchgeführt werden. Für Schäden, die auf eine unsachgemäße Montage zurückzuführen sind, übernimmt TRW keine Haftung.

Definitionen:

HINWEIS

Hierunter sind Zusatzinformationen und Tipps, die bestimmte Vorgänge oder Arbeiten vereinfachen oder beschleunigen können, aufgeführt.

ACHTUNG

Hierunter sind Vorsichtsmaßnahmen zum Schutz vor Sachschäden aufgeführt.

WARNUNG

Hierunter sind Vorsichtsmaßnahmen zum Schutz des Fahrers und der Personen, die Wartungs- und Reparaturarbeiten durchführen, aufgeführt.

GB Model-independent assembly instructions for steel braided brake hoses

These instructions solely serve as a guideline and have not been written for a specific type of vehicle. Follow the detailed instructions in the technical manual of the vehicle manufacturer.

For safety reasons and to achieve an optimum effect, all maintenance and repair activities may only be carried out by trained professionals in accordance with the guidelines and specifications issued by the vehicle manufacturer. TRW accepts no liability for damage caused by inexperienced fitting and assembly.

Definitions:

NOTE

A NOTE gives key information to make a procedure easier or quicker to follow.

CAUTION

A CAUTION refers to measures that have to be followed to avoid property damage.

WARNING

A WARNING refers to measures that have to be followed for the safety of the rider and the person inspecting or repairing.

DE

ACHTUNG

Nur Stahlflexbremsleitungen montieren, deren Verwendungsbereich für das entsprechende Fahrzeug anhand der beiliegenden ABE freigegeben ist oder ein entsprechendes Teilegutachten vorliegt!

HINWEIS

TRW übernimmt keine Gewähr für die richtige Zuordnung der Leitungen zum entsprechenden Fahrzeugmodell. Eigenmächtiges Nacharbeiten und Verändern der Leitung führen zum Verlust von Gewährleistungsansprüchen!

Arbeitsvorbereitung

Verwenden Sie für den Einbau nur geeignetes Werkzeug. Vergewissern Sie sich, dass das Motorrad sicher unterbaut ist. Die Verwendung des vorhandenen Seitenständers ist nicht zu empfehlen, da dieser nicht für einen ausreichend sicheren Stand des Fahrzeuges bei den Umbauarbeiten sorgt.

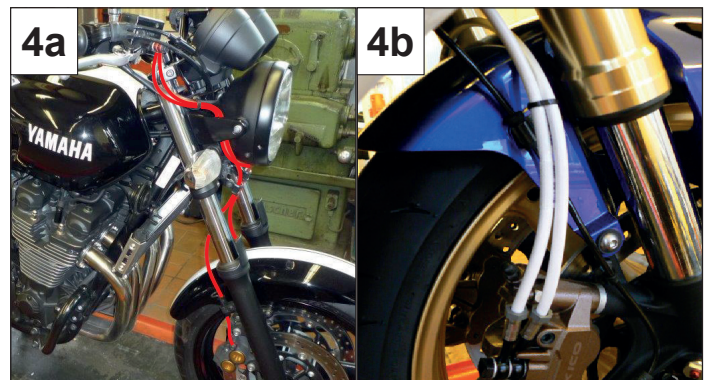

Umbau

1. Alte Bremsflüssigkeit ablassen bzw. mit einem Entlüftergerät absaugen (ökologisch richtige Entsorgung beachten).
2. Bremsschläuche zwischen Betätigungszyylinder, Verteiler und Bremssätteln demontieren.
3. Die gewählte Stahlflexleitung mit dem Original vergleichen und in gleicher Weise verlegen.

HINWEIS

Bei einigen Modellen weicht die Verlegung der Leitungen vom Original ab, da das Verteilungssystem für die Nachrüstung mit Stahlflexleitungen nicht verwendbar ist. In diesen Fällen können die Leitungen folgendermaßen verlegt werden:

4. (a) Version "Race"
 - Stahlflexleitungen vom Hauptbremszylinder direkt zum jeweiligen Bremssattel verlegen. Zur Befestigung am Hauptbremszylinder liegt bei Fahrzeugen mit Doppelscheibe eine Doppelhohlschraube bei.
4. (b) Version "Main&Bridge"
 - Stahlflexleitung vom Hauptbremszylinder direkt zum Bremssattel verlegen. Vom Bremssattel eine Leitung zum gegenüberliegenden Bremssattel verlegen. Bei Fahrzeugen mit Doppelscheibe liegt zur Befestigung am Bremssattel, sofern notwendig, eine Doppelhohlschraube bei.

DE

- Falls erforderlich, Anschlüsse folgendermaßen justieren:

ACHTUNG

**Anschlüsse maximal 180° verdrehen!
Anschlüsse niemals biegen!**

Ringanschlüsse

- Leitung mittels einer Zange auf der Presshülse fixieren und den Ringanschluß mit einem Dorn gleichen Durchmessers (meist 10mm) gegen die Presshülse verdrehen, bis die gewünschte Position erreicht ist (max. 180°).

Gewinde

- Leitung mittels einer Zange auf der Presshülse fixieren und das Gewinde mit einem geeigneten Werkzeug gegen die Presshülse verdrehen, bis die gewünschte Position erreicht ist (max.180°).

Ringanschlüsse 90°

- Den Ringanschluß 90° zuerst mit der Hohlschraube montieren und anschließend mit Hilfe einer Zange an der Presshülse drehen, bis die gewünschte Position erreicht ist (max.180°).

HINWEIS

Beiliegenden Aluminium Dichtringe vor der Montage dünn mit Bremsflüssigkeit benetzen.

- Leitungen mit dem vom Fahrzeughersteller angegebenen Drehmoment festschrauben.

TRW Richtwerte für Anzugsdrehmoment	
Stahlschrauben	25 Nm
Aluminium Hohlschrauben	14 Nm

- Bei Bremsleitungen zwischen Verteiler und Bremssattel gleichermaßen verfahren.
- Neue Bremsflüssigkeit einfüllen und entlüften, bis keine Luftblasen mehr in der Bremsleitungen sind.

HINWEIS

Verwenden Sie nur hochwertige Flüssigkeiten z.B. Lucas DOT 5.1. Damit erzielen Sie maximale Sicherheitsreserven und lange Wartungsintervalle. Überprüfen Sie in den Angaben des Fahrzeugherstellers, welche Bremsflüssigkeiten für Ihr Fahrzeug freigegeben sind. TRW DOT 5.1 ist mit allen anderen Flüssigkeiten auf Glykolbasis mischbar.

ACHTUNG

DOT 5 Silicon ist nicht mit Flüssigkeiten auf Glykolbasis der Spezifikation DOT 3, DOT 4, DOT 5.1 mischbar!

WARNUNG

Die Stahlflexbremsleitungen müssen scheuerfrei, knickfrei und spannungsfrei über den gesamten Federweg verlegt werden. Vermeiden sie ebenfalls Verwindungen!

Überprüfen Sie abschließend die Bremsanlage auf Dichtigkeit und sichere Funktion.

GB

CAUTION

Install only steel braided brake hoses for which the area of application has been approved according to the enclosed type approval or for which a corresponding parts expertise is available!

NOTE

TRW will not assume any liability for the correct allocation of the lines to the respective vehicle model. In case of unauthorized rework and alterations to the line the warranty will become null and void.

Preparations

Use only appropriate tools for installation. Ensure that the motorcycle is securely supported. We do not recommend using the existing side stand as this does not provide sufficiently secure support for the installation work.

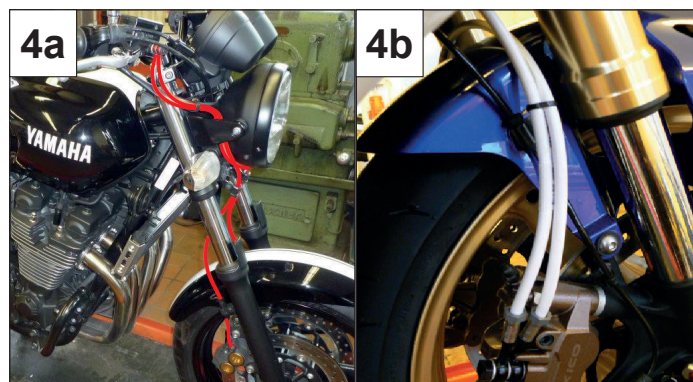

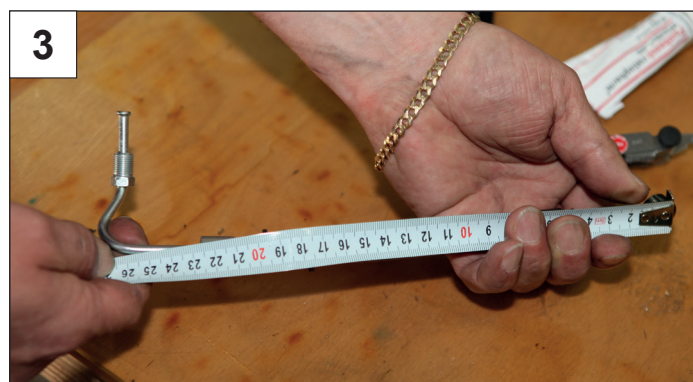

Conversion

1. Drain off old brake fluid or draw it off with a bleeder unit (ensure ecologically correct disposal).
2. Disassemble the brake hoses between the brake cylinder, the distributor and the brake caliper.
3. Compare the selected flexible steel line with the original one and route it in the same way.

NOTE

For some models, routing of the lines differs from the original because the distribution system cannot be used when retrofitting flexible steel lines. In this case, the flexible steel line can be routed as follows:

4. (a) Version “Race”
 - Route the steel lines directly from the master brake cylinder to the corresponding brake caliper. For vehicles with a double disc, a double banjo fitting is supplied to fasten the line to the master brake cylinder.
4. (b) Version “Main&Bridge”
 - Route the steel line directly from the master brake cylinder to the brake caliper and route another line to the opposite caliper. To fasten the line to the caliper on vehicles with a double disc, a double banjo fitting is supplied if needed.

GB

- If necessary readjust the connections as following:

CAUTION

**Turn the connections by a maximum of 180°!
Never bend the connections!**

Ring connections

5. Using pliers, fix the line on the pressed sleeve and turn the ring connection against the pressed sleeve using a mandrel of the appropriate diameter (usually 10mm) until you reach the desired position (180° max.).

Thread

- Using pliers, fix the line on the pressed sleeve and turn the thread against the pressed sleeve using a suitable tool until you reach the desired position (180° max.).

90° ring connections

- First, mount the 90° ring connection using the banjo fitting and then use pliers to turn it on the pressed sleeve until you reach the desired position (180° max.).

NOTE

Before mounting, wet the enclosed aluminium seal rings slightly with brake fluid.

6. Now tighten the brake line. Observe the specified tightening torque given by the vehicle manufacturer.

TRW guideline values for tightening torques	
Steel screws	25 Nm
Aluminium banjo fittings	14 Nm

- Repeat this procedure for brake lines between the distributor and the brake caliper.
7. Now fill in new brake fluid and bleed the system until the line is free of air bubbles.

NOTE

Use only high quality fluids, such as Lucas DOT 5.1. This ensures maximum safety reserves and long service intervals. For brake fluids approved for your vehicle, refer to the specifications of the vehicle manufacturer. TRW DOT 5.1 can be mixed with any other glycol based fluids.

CAUTION

DOT 5 Silicon cannot be mixed with DOT 5.1! or any other glycol based fluids!

WARNING

Steel braided brake hoses must be routed free of chafing, kinks and tension over the entire suspension travel. Twisting must also be avoided!

Finally check the whole brake system for leaks and proper function.
