

AFTERMARKET

Manual.

Como registrarse y reservar las formaciones con éxito.

Registro & Reserva de formaciones.

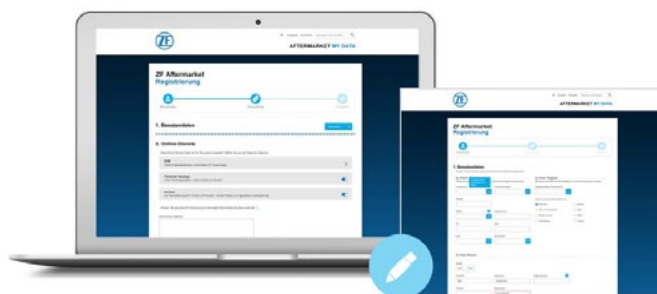

Regístrese en ZF Aftermarket ahora y reserve su formación online en E-Mobility.

Su registro en nuestro portal ZF Aftermarket está dividido en tres pasos. Primero, debe registrarse con sus datos en ZF Aftermarket. Luego debe verificar su correo electrónico y asignar una nueva contraseña. Después de que los dos pasos hayan sido completados con éxito, puede iniciar su sesión en el portal ZF Aftermarket.

A través de su servicio en línea reservado ZF Technical Training, puede ir directamente a Semiro, donde puede reservar y completar su formación en línea de EiP, fácilmente desde casa.

Abajo se explica más detalladamente cada uno de los pasos a seguir.

Registro en el portal de ZF Aftermarket.

Regístrese en:
mydata-aftermarket.zf.com/registration/?locale=en-go&reqapplications=004

Registro.

1. Datos Usuario Final.

1. User Data

General note: Your data will only be saved after the registration has been completed.

About Your Company _____ About Your Activity _____

Company Name Company Type Business Focus

Number of Mechanics Number of Lifting Platforms

You can add optionally further categories:

Seminar Program > E-Mobility > Qualification options > Expertly Instructed Person online course with Webinar

Set Filter: German - Germany

E-Mobility

Qualification options

- Training paths
- Expertly Instructed Person online course with Webinar
- Fundamental Principles of Electrical Engineering
- High Voltage Expert
- ZF Hochvoltexperte für Verkehrsbetriebe - Einstieg Stufe Za

CONTENTS OF TRAINING

Non-electrical work on HV vehicles requires prior instruction (according to DGUV Information 200-005).
Content of the e-learning and of the assigned online test are basic information about “Electrically/expertly instructed person”.
During the Webinar this knowledge is deepened and all open questions will be clarified.
The following topics are covered:

- Different HV qualification levels (according to DGUV Information 200-005)
- permissible and impermissible activities
- HV systems in vehicles (detection of HV vehicles and HV components)
- Hazards of electrical current and behaviour in the event of danger
- Handling of HV vehicles

TRAINING OBJECTIVES

The training is intended to raise employees’ awareness of how to deal with HV systems, enabling them to safely carry out any non-electrical work on the vehicle.
They know the different qualification levels and the associated permitted activities.
The objective is for employees to be able to recognize HV components immediately and unambiguously, understand the associated hazards and be familiar with component markings.

Aquí encontrará información importante sobre el seminario online de E-mobility.
