DESIGNED TO LAST

OUTSTANDING PARTS FOR OUTSTANDING WORKSHOPS

With SACHS, excellence always goes beyond. That's why the SACHS range brings you all the key clutch kit parts and components you will need in one box – including clutch pressure plate, clutch disc and clutch release bearing.

- Pilot bearings for all common vehicle models – so you can be confident we have the right part for every customer
- SACHS DBC provides outstanding vibration damping over the entire speed range – effectively reducing noise and creating a smoother, more comfortable drive
- Kits include special grease for assembly – guaranteeing perfect, long-term clutch functioning for mechanics who insist on the best job for their customers
- Quick and easy ordering – the simplicity of all the right parts with just one order number.

BENEFITS OF SACHS CLUTCH KITS

- The kit's scope of supply includes a special grease for assembly that guarantees perfect, long-term car clutch functioning after the replacement
- The XTend clutch pressure plate for passenger cars separates the wear of the facing from the movement of the diaphragm spring. The compensation mechanism constantly registers reduction in the lining and compensates for the created gap by reliably turning an adjustment ring. This keeps the clutch from becoming vulnerable to extreme temperatures, soiling and aging
- Design: The installation space required axially in the clutch system with operational wear is reduced through the use of XTend.
