

Put TRW to the test.

#1

95% VIO Coverage.
Leader in late model replacements.

#2

OE Manufacturing Expertise.
Engineered to restore like-new original dynamics.

#3

Quality Lasting Product.
Insight into technologies of today and the innovations and requirements of tomorrow.

TECH Need to Know

Complaint	Comfort not same as what comes off.
TRW Solution	OE design meets highest safety, comfort, performance and quality standards.

Complaint	Premature leaking.
TRW Solution	Hardened, chromed and micro-polished piston rods increase durability and prevent rust and piston seal wear.

A TRW SYSTEM

With TRW, every part is built to meet the challenge, just like the 4,000 engineers, designers and product experts around the world who make them. With over 100 years' OE experience, TRW writes the standards for safety and quality.

Reach the experts with any questions. Call our technical hotline at 800.321.0784.

When You Want the Original Feel Back Ask for the OE Product

Consequences of Worn Shock Absorbers

SAFETY

1. Increased stopping distance.
2. Excessive roll (oversteer) during cornering.
3. Reduce steering response.
4. Disrupt functionality of ABS.
5. Uneven wear on tires.

COMFORT

1. Excessive bounce on uneven roads.
2. Unwarned nose dive when braking.
3. Unnecessary vibration on steering wheel.

Diagnosis: Three easy methods that you can check yourself

Check for bounce	Check for tire wear	Check for leaks
Push down on the vehicle body and release. As a general guide, the vehicle should not bounce more than once.	Check for wear spots along the centerline of the tire.	Check if there is oil leakage from the shock absorber.
