## 1. Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

Trade name: ZF EcoFluid XL

Product code: 0671.090.507 0671.090.508

0671.090.509

## 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture: Transmission oil.

Uses advised against:

This product must not be used in applica-

tions other than those listed in Section 1 without first seeking the advice of the

supplier.

#### 1.3 Details of the supplier of the safety data sheet

ZF Friedrichshafen AG ZF Aftermarket Obere Weiden 12 97424 Schweinfurt Germany +49 9721 475 60 www.zf.com/contact

# 1.4 Emergency telephone number 24/7h Emergency telephone number:

Trade name: ZF EcoFluid XL

**ZF Aftermarket** 

Hazard pictograms: No Hazard Symbol required

Signal word: No signal word

Hazard statements

PHYSICAL HAZARDS: Not classified as a physical hazard

according to CLP criteria.

HEALTH HAZARDS: Not classified as a health hazard under CLP

criteria.

ENVIRONMENTAL HAZARDS: Not classified as environmental hazard

according to CLP criteria.

Precautionary statements:

**Prevention:**No precautionary phrases.

**Response:** No precautionary phrases.

**Storage:** No precautionary phrases.

**Disposal:** No precautionary phrases.

Safety data sheet available on request

#### 2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Used oil may contain harmful impurities.

Not classified as flammable but will burn.

## 3. Composition/information on ingredients

### 3.2 Mixtures

Chemical nature Synthetic base oil and additives.

© ZF Friedrichshafen AG

Highly refined mineral oil.

The highly refined mineral oil contains <3% (w/w) DMSOextract, according to IP346. The highly refined mineral oil is only pre-

sent as additive diluent.

Classification based on DMSO extract con-

#### 4. First aid measures

#### 4.1 Description of first aid measures

Protection of first-aiders: When administering first aid, ensure that

you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.

If inhaled:

No treatment necessary under normal

conditions of use.

If symptoms persist, obtain medical advice.

In case of skin contact: Remove contaminated clothing. Flush ex-

posed area with water and follow by wash-

ing with soap if available.

If persistent irritation occurs, obtain medi-

cal attention.

In case of eye contact: Flush eye with copious quantities of water.

Remove contact lenses, if present and easy

to do. Continue rinsing.

If persistent irritation occurs, obtain medi-

cal attention.

If swallowed: In general no treatment is necessary unless

large quantities are swallowed, however,

3/22

get medical advice.

#### 4.2 Most important symptoms and effects, both acute and delayed

© ZF Friedrichshafen AG Revision Date: 12.05.2021

www.zf.com/contact

Trade name: ZF EcoFluid XL

ZF Aftermarket

Symptoms: Oil acne/folliculitis signs and symptoms

may include formation of black pustules and spots on the skin of exposed areas. Ingestion may result in nausea, vomiting

and/or diarrhoea.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment: Notes to doctor/physician:

Treat symptomatically.

5. Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: Foam, water spray or fog. Dry chemical

powder, carbon dioxide, sand or earth may

be used for small fires only.

Unsuitable extinguishing media: Do not use water in a jet.

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting: Hazardous combustion products may in-

clude: A complex mixture of airborne solid

and liquid particulates and gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic

compounds.

5.3 Advice for firefighters

Special protective equipment for fire-

fighters:

Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards

(e.g. Europe: EN469).

Specific extinguishing methods: Use extinguishing measures that are ap-

© ZF Friedrichshafen AG

propriate to local circumstances and the

surrounding environment.

Revision Date: 12.05.2021

ZF Aftermarket

#### 6. Accidental release measures

## 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions: For non emergency personnel:

Avoid contact with skin and eyes.

Emergency responders: For emergency responders:

Avoid contact with skin and eyes.

## **6.2** Environmental precautions

Environmental precautions: Use appropriate containment to avoid envi-

ronmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appro-

priate barriers.

Local authorities should be advised if significant spillages cannot be contained.

## 6.3 Methods and materials for containment and cleaning up

Methods for cleaning up: Slippery when spilt. Avoid accidents, clean

up immediately.

Prevent from spreading by making a barrier with sand, earth or other containment ma-

terial.

Reclaim liquid directly or in an absorbent. Soak up residue with an absorbent such as clay, sand or other suitable material and

dispose of properly

#### 6.4 Reference to other sections

For guidance on selection of personal protective equipment see Chapter 8 of this Safety Data Sheet.

For guidance on disposal of spilled material see Chapter 13 of this Safety Data Sheet.

## 7. Handling and storage

General Precautions:

Use local exhaust ventilation if there is risk

of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate con-

Trade name: ZF EcoFluid XL

ZF Aftermarket

trols for safe handling, storage and disposal of this material.

#### 7.1 Precautions for safe handling

Advice on safe handling: Avoid prolonged or repeated contact with

skin.

Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper han-

dling equipment should be used.

Properly dispose of any contaminated rags or cleaning materials in order to prevent

fires.

Product Transfer: Proper grounding and bonding procedures

should be used during all bulk transfer operations to avoid static accumulation.

Fire-fighting class: Fires involving liquids or liquid containing

substances. Also includes substances which become liquid at elevated

temperatures.

## 7.2 Conditions for safe storage, including any incompatibilities

Storage class (TRGS 510): 10, Combustible liquids

Other data: Keep container tightly closed and in a cool,

well-ventilated place. Use properly labeled

and closable containers.

Store at ambient temperature.

Refer to section 15 for any additional specific legislation covering the packaging and

storage of this product.

The storage of this product may be subject to the Control of Pollution (Oil Storage) (England) Regulations. Further guidance may be obtained from the local environ-

mental agency office.

Packaging material: Suitable material: For containers or con-

tainer linings, use mild steel or high density

polyethylene.

Unsuitable material: PVC.

Container Advice: Polyethylene containers should not be ex-

ral				Threshold
				Limit Values

#### **Biological occupational exposure limits**

No biological limit allocated.

#### **Monitoring Methods**

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls.

For some substances biological monitoring may also be appropriate.

Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory.

Examples of sources of recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

# 8.2 Exposure controls Engineering measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

#### General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle. Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping

#### Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

**Eye protection:** If material is handled such that it could be

splashed into eyes, protective eyewear is

recommended.

Approved to EU Standard EN166.

**Hand protection:** Where hand contact with the product may

occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated

© ZF Friedrichshafen AG Revision Date: 12.05.2021

Trade name: ZF EcoFluid XL

**ZF Aftermarket** 

gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer

is recommended.

For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same, but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.

Skin and body protection:

Skin protection is not ordinarily required beyond standard work clothes. It is good practice to wear chemical resistant gloves.

**Respiratory protection:** 

No respiratory protection is ordinarily reguired under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers.

Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and va-

ZF Aftermarket

pours [Type A/Type P boiling point > 65°C (149°F)] meeting EN14387 and EN143.

Thermal hazards: Not applicable

**Hygiene measures:** Exposure to this product should be re-

duced as low as reasonably practicable. Reference should be made to the Health and Safety Executive's publication "COSHH

Essentials".

**Environmental exposure controls** 

General advice: Take appropriate measures to fulfill the

requirements of relevant environmental

protection legislation. Avoid

contamination of the environment by following advice given in Chapter 6. If necessary, prevent undissolved material from being discharged to waste water. Waste water should be treated in a municipal or industrial waste water treatment plant before discharge to surface water. Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapour.

#### 9. Physical and chemical properties

9.2 Other information

Conductivity: This material is not expected to be a static

accumulator.

10. Stability and reactivity

**10.1 Reactivity** The product does not pose any further re-

activity hazards in addition to those listed

in the following subparagraph.

**10.2 Chemical stability:** Stable.

No hazardous reaction is expected when handled and stored according to provisions

**10.3 Possibility of hazardous reactions:** Reacts with strong oxidising agents.

**10.4 Conditions to avoid:** Extremes of temperature and direct sun-

light

**10.5 Incompatible materials:** Strong oxidising agents.

**10.6** Hazardous decomposition products: No decomposition if stored and applied as

directed

#### 11. Toxicological information

## 11.1 Information on toxicological effects

Basis for assessment: Information given is based on data on the

© ZF Friedrichshafen AG

components and the toxicology of similar products. Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individ-

ual component(s).

Information on likely routes of expo-

sure

Skin and eye contact are the primary routes of exposure although exposure may

occur following accidental ingestion.

**Acute toxicity** 

Product:

Acute oral toxicity: LD50 rat: > 5.000 mg/kg

Remarks: Low toxicity:

Based on available data, the classification

Revision Date: 12.05.2021

Trade name: ZF EcoFluid XL ZF Aftermarket

criteria are not met.

Acute inhalation toxicity: Remarks: Based on available data, the

classification criteria are not met.

Acute dermal toxicity: LD50 Rabbit: > 5.000 mg/kg

Remarks: Low toxicity:

Based on available data, the classification

criteria are not met.

#### Skin corrosion/irritation

Product:

Remarks: Slightly irritating to skin. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Based on available data, the classification criteria are not met.

#### Serious eye damage/eye irritation

Product:

Remarks: Slightly irritating to the eye. Based on available data, the classification criteria are not met.

#### Respiratory or skin sensitisation

Product:

Remarks: For respiratory and skin sensitisation: Not a sensitiser. Based on available data, the classification criteria are not met.

#### Germ cell mutagenicity

Product:

Remarks: Non mutagenic, Based on available data, the classification criteria are not met.

## Carcinogenicity

Product:

Remarks: Not a carcinogen. Based on available data, the classification criteria are not met.

Material	GHS/CLP Carcinogenicity Classification
Highly refined mineral oil	No carcinogenicity classification

## Reproductive toxicity

Product:

Remarks: Not a developmental toxicant. Does not impair fertility. Based on available data, the classification criteria are not met.

### **STOT** - repeated exposure

Product:

Remarks: Based on available data, the classification criteria are not met.

#### **Aspiration toxicity**

Product:

Not considered an aspiration hazard.

#### **Further information**

Product:

Remarks: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal. ALL used oil should be handled with caution and skin contact avoided as far as possible.

Remarks: Slightly irritating to respiratory system.

Remarks: Classifications by other authorities under varying regulatory frameworks

may exist.

#### Summary on evaluation of the CMR properties

Germ cell mutagenicity – Assessment: This product does not meet the criteria for

classification in categories 1A/1B.

Carcinogenicity – Assessment: This product does not meet the criteria for

classification in categories 1A/1B.

Reproductive toxicity – Assessment: This product does not meet the criteria for

classification in categories 1A/1B.

#### 12. Ecological information

#### 12.1 Toxicity

Basis for assessment: Ecotoxicological data have not been de-

termined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products. Unless indicated oth-

erwise, the data presented is

representative of the product as a whole,

rather than for individual component(s).(LL/EL/IL50 expressed as the nominal amount of product required to

prepare aqueous test extract).

of."

12.3 Bioaccumulative potential

Product: Remarks: Contains components with the

Bioakkumulation potential to bioaccumulate.

Partition coefficient: n-octanol/water Pow: > 6 Remarks: (based on information

on similar products)

12.4 Mobility in soil

Product: Remarks: Liquid under most environmental conditions. If it enters soil, it will adsorb to

soil particles and will not be mobile.

12.5 Results of PBT and vPvB assessment

Product: This mixture does not contain any REACH Assessment registered substances that are assessed to

be a PBT or a vPvB.

12.6 Other adverse effects

Product: Does not have ozone depletion potential, Additional ecological information photochemical ozone creation potential o

photochemical ozone creation potential or global warming potential., Product is a mixture of non-volatile components, which will not be released to air in any significant quantities under normal conditions of use. Poorly soluble mixture., Causes physical

fouling of aquatic organisms.

13. Disposal considerations

13.1 Waste treatment methods

Product:

Recover or recycle if possible.

It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with

applicable regulations.

Do not dispose into the environment, in

drains or in water courses.

Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment.

Do not dispose into the environment, in

drains or in water courses.

© ZF Friedrichshafen AG

Do not dispose of tank water bottoms by
