1. Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier
Trade name: ZF-Ecofluid HV
Product code: 0671.090.498
Substance/mixture: Mixture

1.2 Recommended use of the chemical and restrictions on use
Use of the Substance/Mixture: Gearbox oil.
Uses advised against: Do not use for any purpose other than the one for which it is intended

1.3 Details of the supplier of the safety data sheet
ZF Friedrichshafen AG
ZF Aftermarket
Obere Weiden 12
97424 Schweinfurt
Germany
+49 9721 475 60
www.zf.com/contact

1.4 Emergency telephone number
24/7h Emergency telephone number:
+49 (0)89 19240 (Poison emergency call Munich) Information in German and English

2. Hazards identification

2.1 Classification of the substance or mixture
REGULATION (EC) No 1272/2008
For the full text of the H-Statements mentioned in this Section, see Section 2.2.
Classification
The product is not classified as dangerous according to Regulation (EC) No. 1272/2008

2.2 Label elements
Labelled according to REGULATION (EC) No 1272/2008
Hazard Statements: None
Signal word: None
Supplemental Hazard Statements
EUH210 - Safety data sheet available on request
EUH208 - Contains Reaction products of 4-methyl-2-pentanol and diphosphorus pentasulfide, propoxylated, esterified with diphosphorus pentaoxide, and salted by amines, C12-14- tert-alkyl May produce an allergic reaction

2.3 Other information
Physical-Chemical Properties
Contaminated surfaces will be extremely slippery.

Environmental properties
The product may form an oil film on the water surface that may stop the oxygen exchange. Should not be released into the environment.

3. Composition/information on ingredients
3.2 Mixture
Chemical nature
The product is made from refined mineral base oils and synthetic oils.

Hazardous ingredients

SAFETY DATA SHEET
according to Regulation (EC) No. 1907/2006

Trade name: ZF-Ecofluid HV

Additional information
Product containing mineral oil with less than 3% DMSO extract as measured by IP 346.

For the full text of the H-Statements mentioned in this Section, see Section 16.

4. First aid measures

4.1 First aid measures for different exposure routes

General advice: IN CASE OF SERIOUS OR PERSISTENT CONDITIONS, CALL A DOCTOR OR EMERGENCY MEDICAL CARE.

Eye contact: Rinse thoroughly with plenty of water, also under the eyelids. Keep eye wide open while rinsing.

Skin contact: Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing before reuse. High pressure jets may cause skin damage. Take victim immediately to hospital. Remove contaminated clothing and shoes. Wash off with soap and water.

Inhalation: Remove casualty to fresh air and keep at rest in a position comfortable for breathing. If not breathing, give artificial respiration. Inhalation of high concentrations of vapor or aerosols may cause irritation of the upper respiratory tract.

Ingestion: Clean mouth with water. Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Call a physician or Poison Control Center immediately. If swallowed, do not induce vomiting - seek medical advice.

Protection of First-aiders First aider needs to protect himself. See Section 8 for more detail. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask.
equipped with a one-way valve or other proper respiratory medical device. Use personal protective equipment.

4.2 Most important symptoms/effects, acute and delayed

Skin contact: Not classified based on available data. May cause an allergic skin reaction. High pressure injection of the products under the skin may have very serious consequences even though no symptom or injury may be apparent.

Eye contact: Not classified based on available data.

Inhalation: Not classified based on available data. Inhalation of vapors in high concentration may cause irritation of respiratory system.

Ingestion: Not classified based on available data. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

4.3 Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician Treat symptomatically.

5. Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: Carbon dioxide (CO₂). ABC powder. Foam. Water spray or fog.

Unsuitable extinguishing media: Do not use a solid water stream as it may scatter and spread fire.

5.2 Special hazards arising from the substance or mixture

Special Hazard: Incomplete combustion and thermolysis may produce gases of varying toxicity such as carbon monoxide, carbon dioxide, various hydrocarbons, aldehydes and soot. These may be highly dangerous if inhaled in confined spaces or at high concentra-
5.3 Advice for firefighters

Special protective equipment for fire-fighters: Wear self-contained breathing apparatus and protective suit.

Other information: Cool containers / tanks with water spray. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

General Information: Do not touch or walk through spilled material. Contaminated surfaces will be extremely slippery. Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition.

6.2 Environmental precautions

General Information: Do not allow material to contaminate ground water system. Prevent entry into waterways, sewers, basements or confined areas. Local authorities should be advised if significant spillages cannot be contained. Try to prevent the material from entering drains or water courses.

6.3 Methods and materials for containment and cleaning up

Methods for cleaning up: Dike to collect large liquid spills. If necessary dike the product with dry earth, sand or similar non-combustible materials.

Methods for cleaning up: Dam up. Soak up with inert absorbent material. Keep in suitable, closed containers for disposal. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous
SAFETY DATA SHEET
according to Regulation (EC) No. 1907/2006

Trade name: ZF-Ecofluid HV

earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

6.4 Reference to other sections

Personal Protective Equipment: See Section 8 for more detail.

7. Handling and storage

7.1 Precautions for safe handling

Advice on safe handling: For personal protection see section 8. Use only in well-ventilated areas. Do not breathe vapors or spray mist. Avoid contact with skin, eyes and clothing. When using, do not eat, drink or smoke.

Prevention of fire and explosion Take precautionary measures against static discharges.

Hygiene measures Ensure the application of strict rules of hygiene by the personnel exposed to the risk of contact with the product. When using, do not eat, drink or smoke. Wash hands before breaks and immediately after handling the product. Regular cleaning of equipment, work area and clothing is recommended. Do not use abrasives, solvents or fuels. Do not dry hands with rags that have been contaminated with product. Do not put product contaminated rags into workwear pockets. Use personal protective equipment as required. Wash hands before breaks and at the end of workday. Wash hands with water as a precaution. Avoid breathing vapors, mist or gas. Do not wash off with: Fuel. Solvent. Abrasive. Avoid extended and repeated contact with the skin as this may cause skin conditions, which may also be aggravated by minor injuries or by contact with soiled clothing. Avoid prolonged and repeated contact with the
7.2 Conditions for safe storage, including any incompatibilities

Technical measures/Storage Conditions:
Keep away from food, drink and animal feedingstuffs. Keep in a bunded area. Keep container tightly closed. Keep preferably in the original container. Otherwise reproduce all indication of the regulation label on the new container. Do not remove the hazard labels of the containers (even if they are empty). Design the installations in order to avoid accidental emissions of product (due to seal breakage, for example) onto hot casings or electrical contacts. Store at room temperature. Protect from moisture. Protect from frost, heat and sunlight. Store in original container. Keep in properly

Materials to Avoid: Strong oxidizing agents.

7.3 Specific end uses

Specific use(s): Please refer to Technical Data Sheet for further information.

8. Exposure controls/personal protection

8.1 Control parameters

Exposure limits
Mineral oil mist:
USA: OSHA (PEL) TWA 5 mg/m³, NIOSH (REL) TWA 5 mg/m³, STEL 10 mg/m³,
ACGIH (TLV) TWA 5 mg/m³ (highly refined).

8.2 Exposure controls

Occupational Exposure Controls

Engineering Measures: Apply technical measures to comply with the occupational exposure limits. Ensure adequate ventilation, especially in confined areas. When working in confined spaces (tanks, containers, etc.), ensure that there is a supply of air suitable for breathing and wear the recommended equipment.

Personal Protective Equipment

General Information: Protective engineering solutions should be implemented and in use before personal protective equipment is considered. The personal protective equipment (PPE) recommendations apply to the product ITSELF. In case of mixtures or formulations, it is suggested that you contact the relevant PPE suppliers.

Respiratory protection: None under normal use conditions. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Respirator with combination filter for vapour/particulate (EN 14387). Type A/P1. Warning! Filters have a limited use duration. The use of...
breathing apparatus must comply strictly with the manufacturer's instructions and the regulations governing their choices and uses.

</thead>
<tbody>
<tr>
<td>Skin and body protection:</td>
<td>Wear suitable protective clothing. Protective shoes or boots. Long sleeved clothing. Type 4/6. Do not wear rings, watches or anything similar which can retain the product and may give rise to skin conditions. Extended and repeated contacts with skin can cause skin ailments which may be aggravated by minor injuries or contact with soiled clothing.</td>
</tr>
<tr>
<td>Hand Protection:</td>
<td>Hydrocarbon-proof gloves. Fluorinated rubber. Nitrile rubber. In case of prolonged contact with the product, it is recommended to wear gloves complying with EN 420 and EN 374 standards, protecting at least for 480 minutes and having a thickness of 0,38 mm at least. These values are indicative only. The level of protection is provided by the material of the glove, its technical characteristics, its resistance to the chemicals to be handled, the appropriateness of its use and its replacement frequency. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the EC approved gloves.</td>

### 9.2 Other information

**Freezing Point:** No information available

### 10. Stability and reactivity

#### 10.1 Reactivity

None under normal processing.

#### 10.2 Chemical stability:

Stable under recommended storage conditions.

#### 10.3 Possibility of hazardous reactions:

No dangerous reaction known under conditions of normal use. None under normal processing.

#### 10.4 Conditions to avoid:

Keep away from open flames, hot surfaces and sources of ignition. Keep away from heat and sparks. Heat, flames and sparks. Take precautionary measures against static discharges. Heat (temperatures above flash point), sparks, ignition points, flames, static electricity. Strong oxidizing agents.

#### 10.5 Incompatible materials:

Strong oxidising agents.

#### 10.6 Hazardous decomposition products:

Incomplete combustion and thermolysis may produce gases of varying toxicity such as carbon monoxide, carbon dioxide, various hydrocarbons, aldehydes and soot.
Phosphorous oxides. Nitrogen oxides (NOx). Combustion products include sulphur oxides (SO2 and SO3) and Hydrogen sulphide H2S.

11. Toxicological information

11.1 Information on toxicological effects

Acute toxicity Local effects Product Information

Skin contact: Not classified based on available data. May cause an allergic skin reaction. High pressure injection of the products under the skin may have very serious consequences even though no symptom or injury may be apparent.

Eye contact. Not classified based on available data.

Inhalation Not classified based on available data. Inhalation of vapors in high concentration may cause irritation of respiratory system.

Ingestion Not classified based on available data. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

ATEmix (inhalation-dust/mist) 112.70 mg/l

12.4 Mobility

- Soil: Given its physical and chemical characteristics, the product generally shows low soil mobility.
- Air: Loss by evaporation is limited.
- Water: The product is insoluble and floats on water.

12.5 Results of PBT and vPvB assessment

PBT and vPvB assessment: No information available.

12.6 Other adverse effects

General Information: No information available.

13. Disposal considerations

13.1 Waste treatment methods

Waste from Residues / Unused Products: Should not be released into the environment. Do not empty into drains. Dispose of in accordance with the European Directives on waste and hazardous waste. Where possible recycling is preferred to disposal or incineration. After use, this oil must be sent to a licensed waste oil facility. Incorrect disposal of used oil poses a risk to the environment. Mixture with other waste types such as solvents, brake- and cooling liquids is forbidden. Dispose of in accordance with local regulations. If recycling is not practicable, dispose of in compliance with local regulations.

Contaminated packaging: Empty containers should be taken to an approved waste handling site for recycling or disposal.

EWC Waste Disposal No.: According to the European Waste Catalogue, Waste Codes are not product specific, but application specific. Waste codes should be assigned by the user based on

This safety data sheet complies with the requirements of Regulation (EC) No. 1907/2006

This safety data sheet serves to complete but not to replace the technical product
sheets. The information contained herein is given in good faith and is accurate to the best of knowledge at the date indicated above. It is understood by the user that any use of the product for purposes other than those for which it was designed entails potential risk. The information given herein in no way dispenses the user from knowing and applying all provisions regulating his activity. The user bears sole liability for the precautions required when using the product. The regulatory texts indicated herein are intended to aid the user to fulfil his obligations. This list is not to be considered complete and exhaustive. It is the user's responsibility to ensure that he is subject to no other obligations than those mentioned.
