SAFETY DATA SHEET

Trade name: ZF-LIFEGUARDFLUID 6

1. Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name: ZF-LIFEGUARDFLUID 6

Product code: S671.090.250
S671.090.252
S671.090.253
S671.090.255

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture: Transmission oil

Uses advised against: This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the supplier.

1.3 Details of the supplier of the safety data sheet

ZF Friedrichshafen AG
ZF Aftermarket
Obere Weiden 12
97424 Schweinfurt
Germany
+49 9721 475 60
www.zf.com/contact

1.4 Details of Australian Importer/Supplier

ZF Services Pty Limited
Unit 1, 13 Bessemer Street
Blacktown, NSW 2148
+61 2 9679 5555

1.5 Emergency telephone number

24/7h Emergency telephone number:
Australia ZF 24/7: Tel (+1) 300 938 324 (in English)
International GBK-EMETEL: Tel (+1) 352 323 3500 (in English)
+49 (0)89 19240 Information in German and English

2. Hazards identification

2.1 Classification of the substance or mixture
SAFETY DATA SHEET

Trade name: ZF-LIFEGUARDFLUID 6

GHS Classification
Chronic aquatic toxicity, Category 3

2.2 Label elements

GHS label elements

Hazard pictograms: No Hazard Symbol required
Signal word: No signal word required
Hazard statements

PHYSICAL HAZARDS: Not classified as a physical hazard under GHS criteria.
HEALTH HAZARDS: Not classified as a health hazard under GHS criteria.
ENVIRONMENTAL HAZARDS: H412 Harmful to aquatic life with long lasting effects.

Precautionary statements:
Prevention: P273 Avoid release to the environment.
Response: No precautionary phrases.
Storage: No precautionary phrases.
Disposal: P501 Dispose of contents/ container to an approved waste disposal plant.

Sensitising components:
Contains calcium sulphonate
Contains substituted hydrocarbyl sulphide
Contains borated ester
May produce an allergic reaction

2.3 Other hazards
Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.
Used oil may contain harmful impurities.
Not classified as flammable but will burn.
3. Composition/information on ingredients

3.2 Mixtures

Chemical nature

Synthetic base oil and additives. Highly refined mineral oil. The highly refined mineral oil contains <3% (w/w) DMSO extract, according to IP346. The highly refined mineral oil is only present as additive diluent.

* contains one or more of the following CAS-numbers: 64742-53-6, 64742-54-7, 64742-55-8, 64742-56-9, 64742-65-0, 68037-01-4, 72623-86-0, 72623-87-1, 8042-47-5, 848301-69-9.

For explanation of abbreviations see section 16.

4. First aid measures

4.1 Description of first aid measures
General advice: Not expected to be a health hazard when used under normal conditions.

Protection of first-aiders: When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.

If inhaled: No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.

In case of skin contact: Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.

In case of eye contact: Flush eye with copious quantities of water. Remove contact lenses, if present and easy to do. Continue rinsing. If persistent irritation occurs, obtain medical attention.

If swallowed: In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms: Oil acne/folliculitis signs and symptoms may include formation of black pustules and spots on the skin of exposed areas. Ingestion may result in nausea, vomiting and/or diarrhoea.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment: Notes to doctor/physician: Treat symptomatically.

5. Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
SAFETY DATA SHEET

Trade name: ZF-LIFEGUARDFLUID 6

Unsuitable extinguishing media: Do not use water in a jet.

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic compounds.

5.3 Advice for firefighters

Special protective equipment for firefighters: Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).

Specific extinguishing methods: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Hazchem Code NONE

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions: For non emergency personnel: Avoid contact with skin and eyes.

Emergency responders: For emergency responders: Avoid contact with skin and eyes.

6.2 Environmental precautions

Environmental precautions: Use appropriate containment to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.
SAFETY DATA SHEET

Trade name: ZF-LIFEGUARDFLUID 6

Local authorities should be advised if significant spillages cannot be contained.

6.3 Methods and materials for containment and cleaning up
Methods for cleaning up:
- Slippery when spilt. Avoid accidents, clean up immediately.
- Prevent from spreading by making a barrier with sand, earth or other containment material.
- Reclaim liquid directly or in an absorbent.
- Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly.

6.4 Reference to other sections
For guidance on selection of personal protective equipment see Chapter 8 of this Safety Data Sheet.
For guidance on disposal of spilled material see Chapter 13 of this Safety Data Sheet.

7. Handling and storage

General Precautions:
- Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols.
- Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

7.1 Precautions for safe handling

Advice on safe handling:
- Avoid prolonged or repeated contact with skin.
- Avoid inhaling vapour and/or mists.
- When handling product in drums, safety footwear should be worn and proper handling equipment should be used.
- Properly dispose of any contaminated rags or cleaning materials in order to prevent fires.

Avoidance of contact

Strong oxidising agents

Product Transfer:

This material has the potential to be a static accumulator.
Proper grounding and bonding procedures should be used during all bulk transfer operations.

Fire-fighting class:
Fires involving liquids or liquid containing substances. Also includes substances which become liquid at elevated temperatures.

7.2 Conditions for safe storage, including any incompatibilities

Other data:
Keep container tightly closed and in a cool, well-ventilated place. Use properly labeled and closable containers.
Store at ambient temperature.

Packaging material:
Suitable material: For containers or container linings, use mild steel or high density polyethylene.
Unsuitable material: PVC.

Container Advice:
Polyethylene containers should not be exposed to high temperatures because of possible risk of distortion.

7.3 Specific end use(s)

Specific use(s) Not applicable

8. Exposure controls/personal protection

8.1 Control parameters
Components with workplace control parameters

</tr>
</tbody>
</table>
8.2 Exposure controls

Engineering measures
The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:
Adequate ventilation to control airborne concentrations. Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:
Define procedures for safe handling and maintenance of controls. Educate and train workers in the hazards and control measures relevant to normal activities associated with this product. Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation. Drain down system prior to equipment break-in or maintenance. Retain drain downs in sealed storage pending disposal or subsequent recycle. Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

**Personal protective equipment**

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

**Eye protection:**
If material is handled such that it could be splashed into eyes, protective eyewear is recommended.

**Hand protection:**
Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves.
Skin and body protection: Skin protection is not ordinarily required beyond standard work clothes. It is good practice to wear chemical-resistant gloves.

Respiratory protection: No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and vapours [Type A/Type P boiling point > 65°C (149°F)] meeting EN14387 and EN143.

Environmental exposure controls General advice: Take appropriate measures to fulfill the requirements of relevant environmental protection legislation. Avoid
contamination of the environment by following advice given in Chapter 6. If necessary, prevent undissolved material from being discharged to waste water. Waste water should be treated in a municipal or industrial waste water treatment plant before discharge to surface water. Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapour.

**9.2 Other information**

- **Conductivity:** This material is not expected to be a static accumulator.
- **Decomposition temperature:** Data not available

**10. Stability and reactivity**

**10.1 Reactivity**

The product does not pose any further reactivity hazards in addition to those listed in the following subparagraph.

**10.2 Chemical stability:** Stable.
10.3 **Possibility of hazardous reactions:** Reacts with strong oxidising agents.

10.4 **Conditions to avoid:** Extremes of temperature and direct sunlight.

10.5 **Incompatible materials:** Strong oxidising agents.

10.6 **Hazardous decomposition products:** Hazardous decomposition products are not expected to form during normal storage.

11. **Toxicological information**

11.1 **Information on toxicological effects**

**Basis for assessment:** Information given is based on data on the components and the toxicology of similar products. Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

**Information on likely routes of exposure**

Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.

**Acute toxicity**

- **Product:**
  - LD50 rat: > 5.000 mg/kg
  - Remarks: Expected to be of low toxicity

- **Acute oral toxicity:**
  - LD50 rat: > 5.000 mg/kg
  - Remarks: Expected to be of low toxicity

- **Acute inhalation toxicity:**
  - Remarks: Not considered to be an inhalation hazard under normal conditions of use.

- **Acute dermal toxicity:**
  - LD50 Rabbit: > 5.000 mg/kg
  - Remarks: Expected to be of low toxicity

**Skin corrosion/irritation**

- **Product:**
  - Remarks: Expected to be slightly irritating. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.
SAFETY DATA SHEET

Trade name: ZF-LIFEGUARDFLUID 6

Serious eye damage/eye irritation
Product:
Remarks: Expected to be slightly irritating.

Respiratory or skin sensitisation
Product:
Remarks: For respiratory and skin sensitisation: Not expected to be a sensitiser.

Components:
Substituted hydrocarbyl sulphide:
Remarks: Experimental data has shown that the concentration of potentially sensitising components present in this product does not induce skin sensitisation. May cause an allergic skin reaction in sensitive individuals.

Calcium alkaryl sulphonate:
Remarks: May cause an allergic skin reaction in sensitive individuals.

Borated ester:
Remarks: May cause an allergic skin reaction in sensitive individuals.

11.2 Chronic toxicity

Germ cell mutagenicity
Product:
Remarks: Not considered a mutagenic hazard.

Carcinogenicity
Product:
Remarks: Not expected to be carcinogenic.

<table>
<thead>
<tr>
<th>Material</th>
<th>GHS/CLP Carcinogenicity Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Highly refined mineral oil</td>
<td>No carcinogenicity classification</td>
</tr>
</tbody>
</table>

Reproductive toxicity
Product:
Remarks: Not expected to impair fertility, Not expected to be a developmental toxicant.

STOT - single exposure
Product:
Remarks: Not expected to be a hazard.

STOT - repeated exposure
Product:
Remarks: Not expected to be a hazard.

Aspiration toxicity
Product:
Not considered an aspiration hazard.

Further information
Product:
Remarks: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal. ALL used oil should be handled with caution and skin contact avoided as far as possible.
Remarks: Slightly irritating to respiratory system.

12. Ecological information

12.1 Toxicity
Basis for assessment: Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products. Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s). (LL/EL/IL50 expressed as the nominal amount of product required to prepare aqueous test extract).

Product: Remarks: Expected to be harmful:
Toxicity to fish (Acute toxicity): LL/EL/IL50 10-100 mg/l
Toxicity to crustacean (Acute toxicity) Remarks: Expected to be harmful:
LL/EL/IL50 10-100 mg/l
Toxicity to algae/aquatic plants (Acute toxicity) Remarks: Expected to be harmful:
LL/EL/IL50 10-100 mg/l
Toxicity to fish (Chronic toxicity) Remarks: Data not available
Toxicity to crustacean (Chronic toxicity) Remarks: Data not available
Toxicity to microorganisms (Acute toxicity) Remarks: Data not available

Components:
Ethoxylated amine

#### 12.2 Persistence and degradability

**Product:**

- **Biodegradability:** Remarks: Expected to be not readily biodegradable. Major constituents are expected to be inherently biodegradable, but contains components that may persist in the environment.

#### 12.3 Bioaccumulative potential

**Product:**

- **Bioaccumulation:** Remarks: Contains components with the potential to bioaccumulate.

**Partition coefficient: n-octanol/water**

- **Pow:** > 6 Remarks: (based on information on similar products)

#### 12.4 Mobility in soil

**Product:**

- **Mobility:** Remarks: Liquid under most environmental conditions. If it enters soil, it will adsorb to soil particles and will not be mobile. Remarks: Floats on water.

#### 12.5 Other adverse effects

**Product:**

- **Additional ecological information:** Product is a mixture of non-volatile components, which are not expected to be released to air in any significant quantities. Not expected to have ozone depletion potential, photochemical ozone creation potential or global warming potential. Poorly soluble mixture. May cause physical fouling of aquatic organisms.

---

### 13. Disposal considerations

#### 13.1 Waste treatment methods

**Product:** Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations.
Do not dispose into the environment, in drains or in water courses. Waste product should not be allowed to contaminate soil or ground water or be disposed of into the environment. Waste, spills or used product is dangerous waste.

Contaminated packaging: Dispose in accordance with prevailing regulations, preferably to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand. Disposal should be in accordance with applicable regional, national, and local laws and regulations.

Local legislation Remarks: Disposal should be in accordance with applicable regional, national, and local laws and regulations.

14 Transport information

14.1 National Regulations
ADG Not regulated as a dangerous good

14.2 International Regulations
IATA-DGR Not regulated as a dangerous good
IMDG Not regulated as a dangerous good

14.3 Special precautions for user
Remarks: Special Precautions: Refer to Chapter 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

14.4 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Pollution category: Not applicable
Ship type: Not applicable
Product name: Not applicable
Special precautions: Not applicable
Additional Information: MARPOL Annex 1 rules apply for bulk shipments by sea.

15. Regulatory information
15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
Standard for the Uniform: No poison schedule number allocated

15.2 Scheduling of Medicines and Poisons

15.3 Other international regulations
The components of this product are reported in the following inventories:
EINECS: All components listed or polymer exempt.
TSCA: All components listed.
AICS: All components listed.

16. Other information

Full text of H-Statements

H290 May be corrosive to metals.
H302 Harmful if swallowed.
H304 May be fatal if swallowed and enters airways.
H314 Causes severe skin burns and eye damage.
H317 May cause an allergic skin reaction.
H318 Causes serious eye damage.
H400 Very toxic to aquatic life.
H410 Very toxic to aquatic life with long lasting effects.
