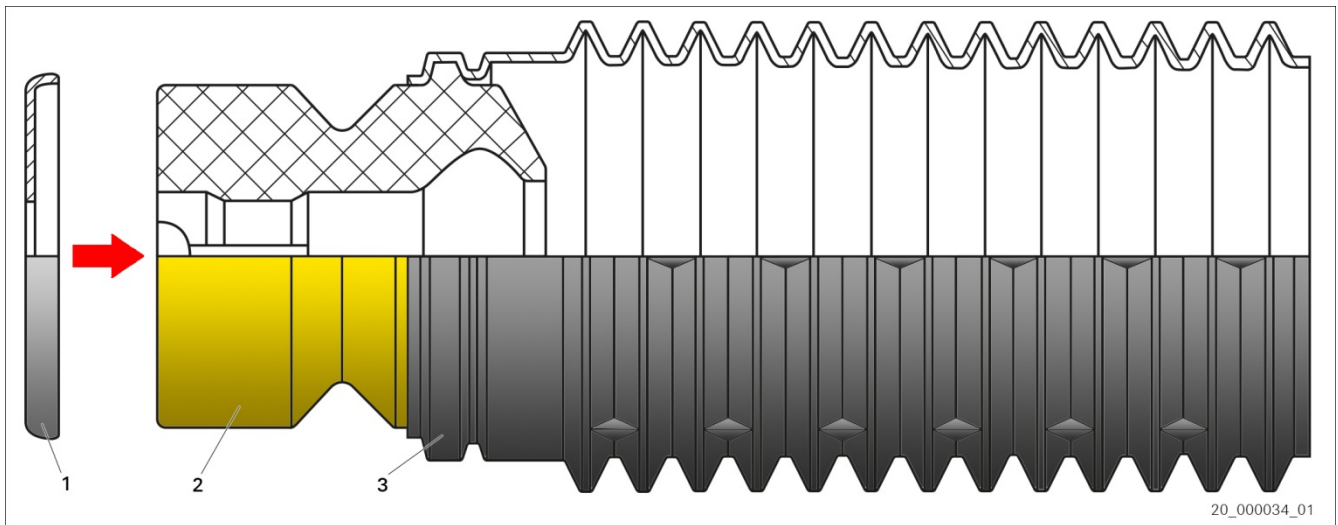

Fig. 1: Service kit with metal cap

- 1 Metal cap
2 Compression stop
3 Protective tube

Do not dispose of the metal cap (1).

The metal cap is not included in the service kit scope of supply.

Assemble the service kit

1. Remove the metal cap (1) from the dismantled service kit.
2. Clean the metal cap (1) and check for damage.
3. Insert the metal cap (1) on the compression stop (2).
4. Insert the protective tube (3) on the compression stop (2).
