

Art.-Nr. 2294 501 190, 2290 601 073, 2294 501 172, 2290 601 043

Fig. 1: DMF with transport safety device

1 Retention pin

The transport safety device with retention pin (1) prevents the primary mass and the secondary mass from twisting.

The retention pin (1) shears off at a predetermined breaking point when the engine starts. The sheared-off parts remain at a specified place in the DMF.

NOTICE

Material damage possible.

⇒ Do not remove the transport safety device manually.
